2022
Kia EV6

Kia. The new word for electric.

We are witnessing the dawn of an exciting new era in motoring.

The electric revolution has arrived, bringing with it a quantum leap in the way cars are built, powered and driven. At Kia, our designers and engineers are already moving ahead, creating a new class of advanced electric vehicles to inspire today and into the future.

Movement that inspires

Overseas model shown

EV6 by Kia.
Pure electric genius.

The Kia EV6 is far from your average EV. Designed from the ground up, it is an multi-award winning, pure electric vehicle that sets new standards in design, performance, comfort and efficiency.

With a range of up to 528 kilometres on a single charge and 800V ultra-fast charging, EV6 represents the next generation of EV's.

As you approach the EV6, the sleek lines and athletic stance will take your breath away. The EV6 senses your approach, automatically extending the flush door handles to greet you. As you settle into the ultra-supportive seat, you find yourself in a world of luxurious details and highly intuitive technology. Turn the e-shift dial and glide away.

As you feel the satisfying surge of clean power, you realise that the future looks very bright indeed.

Overseas model shown.

Design to redefine

To create the EV6, Kia's design and engineering teams started with a clean sheet - or more precisely, a clean platform.

EV6 is the first vehicle to be built on Kia's visionary Electric-Global Modular Platform (E-GMP). Developed exclusively for electric vehicles, E-GMP delivers superior handling and safety as well as increased power and range and ultra-rapid charging times.

One of the most remarkable things about E-GMP is its ability to maximise interior space. Without the need for an engine or drivetrain, it provides a completely flat floor, allowing for a diverse range of interior layouts.

The EV6 sits on a 2.9m wheelbase, similar in length to a large SUV. This translates into luxurious amounts of interior space with legroom of 1,078mm at the front and 990mm at the rear. Even with four people, there is still plenty of space to stretch out and enjoy the journey.

When it comes to head-turning style, the E-GMP platform has given Kia's design team free reign to realise their vision of a vehicle that truly stands out from the crowd. With minimal front and rear overhangs, EV6's stunning lines reimagine what is possible in a spacious five-door crossover.

Not all features are available on all models.

Overseas model shown.

Touch and go

You never forget the first time you step on the accelerator of the EV6. That immediate surge of smooth, silent power can be quite addictive.

With an all-electric drivetrain, the standard EV6 Air offers a lively 125 kW and 350 Nm of torque, while AWD long range models can deliver up to 239 kW and 605 Nm - the kind of power that takes you from 0 to 100 km/h in just 5.2 seconds. Importantly, for many Kiwi families, the EV6 is also capable of towing up to 1,600kg, provided there is more than 35% of charge left in the battery.

Selecting Drive, Neutral or Reverse is simply a matter of turning the large and intuitive E-Shift dial, while Drive Mode Select lets you tailor the EV6's performance to your preferred driving style. Sport mode dials up the acceleration, Eco conserves energy to extend your driving range or choose Normal for the best of both worlds.

To transfer all of that power to the road, the EV6 comes standard with rear wheel drive or the option of torque-vectoring e-AWD, with dual motors delivering blistering acceleration and assured all-weather traction.

Not all features are available on all models.

Leading the charge

Advanced battery technology sets EV6 apart as one of the most versatile and powerful electric vehicles on the road.

Fancy a road trip from Queenstown to Christchurch, Wellington to Hamilton or Auckland to Rotorua? With up to 528km^ of driving range, EV6 gives you the freedom to get there and back on a single charge. Regenerative braking extends your range even further, while waste heat is recaptured from the motor and other electric components to reduce winter range loss by almost 19% (grade dependent).

The EV6 is not only quick off the mark, it's also incredibly quick to charge.

With Ultra Fast Charging it takes as little as 18 minutes to go from 10 to 80% charge and if a small power boost is needed on a longer trip, it's possible to achieve a top-up charge of 100km in less than five-minutes. Accessed via an electronically controlled cover, the multi-charging system operates with both 400 V and 800 V chargers without the need for an additional adapter.

When you need a little extra power for something else, like inflating an air-bed or powering a fridge, the EV6 becomes your portable energy source. The innovative Vehicle-to-load (V2L) function delivers 3.6 kW of 220 V AC power - more than enough to run your devices. The V2L Adaptor is available for purchase as a vehicle accessory from your local Kia dealer.

Not all features are available on all models.

Settle into the future

Just like its stunning exterior, the interior of the EV6 is a masterpiece of beautiful and functional design. Every detail has been considered to make this the most comfortable, secure and sustainable driving environment possible.

Settle into the heated and ventilated front seats and you'll immediately notice the luxurious amounts of legroom. This is courtesy of the EV6's flat floor, which extends into an equally generous cargo space. The panoramic sunroof fills the cabin with natural light, enhancing the feeling of spaciousness.

Ahead of you, two curved, panoramic screens provide a huge 24 inches of immersive display for navigation, entertainment, convenience and vehicle information. The display is both beautiful to look at and easy on the eyes with an integrated blue light filter to reduce eye strain and driver fatigue.

Adjust the ambient lighting to set the mood and stream your favourite artist on the 14-Speaker Meridian® Premium Sound System. The separate subwoofer and external amplifier surround you with rich and detailed hi-fi sound with no engine noise to detract from the performance.

Thoughtful features abound, including a wireless charging pad for your phone and USB-A and USB-C ports integrated into the floating centre console. Rear seat passengers have their own USB-C ports behind each front seat, ensuring that every device is charged and connected.

Select Drive mode using the dial selector and glide silently away. During your journey, the EV6's augmented reality, heads-up display projects key information, including speed, navigation guidance and lane safety information onto the windscreen.

Enjoy the journey. This is a driving environment you'll love to be in, hour after hour.

Not all features are available on all models.

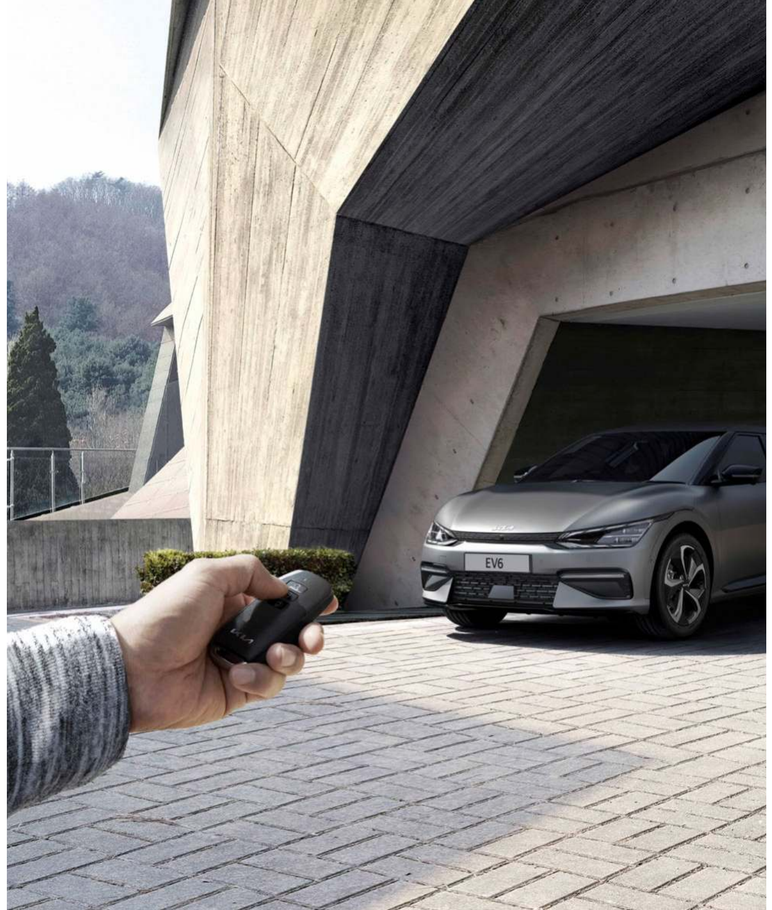

A technological tour de force

At Kia, we believe that our vehicles should move your life forward in every way possible. It's part of our driving philosophy of inspiring mobility. Now, the EV6 takes this philosophy to a new level with a host of intelligent convenience and safety features, designed to both enhance your life and protect it.

Take the Remote Smart Parking Assist system for example. This ingenious feature allows you to remotely park your EV6 and exit parking spaces from outside the vehicle using the key fob. A suite of advanced sensors takes control, precisely guiding the vehicle into even the tightest of parking spaces.

The same innovative thinking powers the hands-free smart tailgate, which can be set to open to a desired height, avoiding low ceilings or other obstacles. When you have your hands full, simply stand behind your parked EV6 for 3 seconds with the key close by. The tailgate will sense your presence and open automatically.

EV6 is also the first Kia to introduce i-Pedal mode, allowing you to control the vehicle's speed and braking using only the accelerator pedal. It's the perfect antidote for stop-start city traffic.

Not all features are available on all models.

Putting the tech into protection

Wherever you go, day or night, multiple camera systems are constantly on the lookout to protect you and your EV6.

Using four exterior mounted cameras, the Surround View Monitor provides a zoomable, 360 of your EV6 and its surroundings. It's a great confidence boost when manoeuvring in tight spaces or parallel parking.

While reversing at low speed from a park, this system will warn you and assist with braking if it detects an oncoming vehicle. Before a passenger exits the EV6, Safe Exit Assist will warn and if necessary keep the door locked if it detects a vehicle approaching from behind in the blind spot.

On the open road, Smart Cruise Control* uses radar sensors and a camera to maintain a safe distance from the vehicle directly ahead while a trio of anti collision systems scans for pedestrians and oncoming vehicles at intersections. And because there isn't always a visible road sign, the EV6's Intelligent Speed Limit Assist system uses a front view camera and navigation data to keep you informed of the current speed limit.

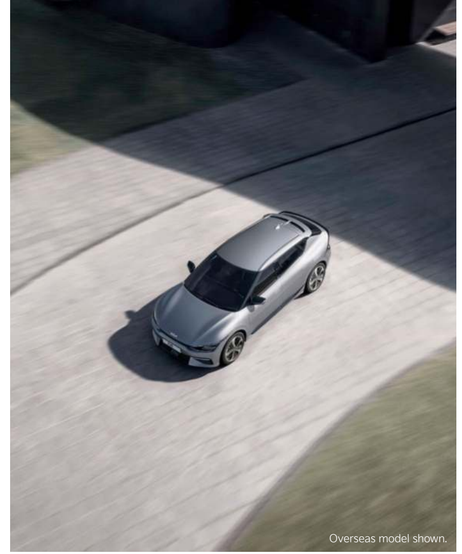

Overseas model shown.

Overseas model shown.

Overseas model shown.

Overseas model shown.

Activate the turn signal and the wide-angle, side mirror mounted cameras act as a second pair of eyes, displaying live footage of your blind spots on the dash cluster display screen. Should you attempt to change lanes while an object is in the blind spot, the Blind Spot Collision Avoidance system warns you with audio-visual alerts and haptic steering feedback. Even if you were to miss these warnings, the Electronic Stability Control will ultimately take over to prevent a collision.

BODY COLOURS

Glacier
(not available on GT-Line)
Drawing from nature, this striking shade highlights the dramatic curves of your EV6 like the sculpted forms created by ice and wind.

Runway Red
A eye-catching shade for those who love the classic sportscar look. Bold and extraverted in a way that's never overstated or brash.

Moonscape Matte
(Premium paint charge applies - $1,450 incl. GST)
Launch your EV6 with an out-of-this-world matte finish to accentuate its striking lines and dramatic curves.

Snow White Pearl
(available on GT-Line only)
A dazzling, pearlescent white that sparkles like new-fallen snow. The perfect contrast with a dramatic, dark interior.

Yacht Blue
Cruise through life with this deep, metallic blue that evokes the sun dancing on the ocean and sails on the horizon.

Aurora Black Pearl
The mesmerising motion of light in the pearlescent finish brings an extra sense of intrigue to this deep, lustrous black.

Deep Forest Green
Go green with this deep, vibrant hue with a subtle shimmer, the perfect match for the pure electric EV6.

Colour swatches are indicative only, vehicle body colours may appear different in person.

Information contained herein is for comparative purposes only. Specifications at any given time may vary to the above.
* Driving range figures standards are calculated using the World Harmonised Light Vehicle Test Procedure (WLTP). Actual results achieved will differ according to operating conditions and driving style.
** Charging times of the high voltage battery may vary according to the condition and durability of the high voltage battery, charger specifications and ambient temperature.
*** Not all handsets may be compatible..
**** Maximum Towing Capacity should only be achieved when the battery has more than 35% charge remainig
∞ Apple CarPlay: Requires an iPhone 5 or later and it is recommended to always update your iPhone to the latest iOS release. Use the Apple Lighteningcable provided with your phone, or Apple certified Lightening cable.
† Android Auto: Requires an Android phone with Android 5.0 Lollipop or higher. It is recommended to always update your phone to the latest OS release. Use the USB cable provided with your phone.
Kia Motors cannot guarantee continued compatibility.

ECO-CONSCIOUS

BLUE SKY THINKING.

Advanced electric vehicles like EV6 show the way toward a clean, emission free future. Kia is committed to pioneering environmentally friendly technologies and our Environmental Research Centre in Seoul spearheads our drive for the production of clean hybrid and fuel-cell vehicles.

Our vehicles are designed to minimise their environmental impact throughout their entire lifecycle, based on strict Design for Recycling (DfR) guidelines. When your Kia reaches the end of its life, virtually all of its components can be recycled, or disposed of safely and sustainably.

We only have one planet. Our goal at Kia is to help you enjoy it and preserve it.

5 YEAR Warranty Programme

(OR UP TO 100,000 KMS)

All new Kia Passenger Vehicles come with an impressive 5-Year/100,000 km (whichever comes first) Warranty Programme covering against manufacturing or assembly defects. This warranty programme is transferable between owners and emphasises our commitment to our customers.

7 YEAR High Voltage Drive Battery Warranty

(OR UP TO 160,000 KMS)

All new Kia vehicles that are powered by a high-voltage drive battery come with a 7-year/160,000 km (whichever comes first) warranty that covers components found in the drive battery case. In the event that your vehicle becomes immobile due to a high voltage battery or system failure, we'll cover the cost of the tow to the nearest authorised Kia dealer.

5 YEAR Roadside Assist

A Roadside Assistance Programme for the duration of the Warranty Period is also offered on every new Kia at no cost. In the unlikely event that your Kia has broken down, help is only a call away and trained staff will be despatched to your location. If a repair cannot be conducted on the spot, the vehicle will be towed free of charge to the nearest Kia dealer.

INCIDENT CARE

If you and your new Kia were unfortunately involved in an incident or crash that requires body repairs to your Kia, Kia Incident Care is here to help you, and is free for the first five years.

Movement that inspires
