

stinger

From concept car to reality, the Stinger is a true gran turismo for the modern era. A car for spirited long-distance driving, the Stinger combines high power with handling grace, stunning design with a luxurious and spacious cabin, and on-road comfort with innovative technologies.

"We've made a lot of great cars and I'm proud of all of them, but the Stinger is something special."

PA. Schreyer

Peter Schreyer
President & Chief Design Officer

Lambda 3.3 TT-GDI engine

A twin turbocharger helps this V6 engine achieve considerable torque over a broad rpm range. The exhaust manifold is integrated with the cylinder head for added power and an electronic thermostat helps provide precise temperature control.

510
NM Torque

272
kW

Theta II 2.0 T-GDI engine

A twin-scroll turbocharger boosts low to mid rev efficiency while newly applied technologies provide phenomenal combustion efficiency. The engine produces maximum power output of 182 kW at 6,200 rpm and maximum torque output of 353 Nm from 1,400 to 4,000 rpm.

353
NM Torque

182
kW

AN OBSESSION WITH THE DETAILS

Dark chrome finished outside mirrors and trim

The dark chrome finish of the trim and wing mirror conveys refined, performance oriented luxury while adding to the stunning look of the Stinger.

19" alloy wheels

Available on the GT Sport™, aggressive 19" alloy wheels speak to the deep gran turismo sentiments of drivers everywhere.

350mm disc brakes with Brembo® red brake calipers

On the GT Sport™, the red Brembo® brake calipers provide better braking power that is immediately more noticeable.

Full LED headlamps

Full LED headlamps demonstrate that Stinger uses the best technology where it provides more intense lighting with less power consumption.

Rear LED lamps & quad exhaust pipes

Modern, stylish LED lights illuminate to add to the Stinger's signature look. While four oval exhaust tips announce that the Stinger is ahead.

Smart Power Trunk

The hands free Smart Power Trunk opens automatically within three seconds when you stand close to the rear of the vehicle without having to reach for your key.

CLASSIC SOPHISTICATION

8-inch color LCD touchscreen audio

Easy to read and operate, the vivid "floating" 8-inch color LCD touch screen combines important vehicle information with controls that can play audio files from connected devices.

Electronic parking brake (EPB)

An electronic parking brake offers quick, secure activation without the effort required by traditional mechanical brake levers. Pull on the EPB switch on the center console to activate the parking brake. Auto Hold mode temporarily maintains the vehicle at a standstill even if the brake pedal is released.

Ventilated & heated front seats

Ventilated front seats provide a three stage cooling airflow on hot days, and more effective and thorough heating on cold days. Both the seat cushion and the seatback feature airflow perforations to keep more of the body in a state of comfort.

Dual zone climate control

A standard dual-zone full auto temperature control system along with rear seat climate control gives the driver and all passengers separate controls, allowing people with different climate needs to ride together in comfort.

Side bolster adjustment

Optional side-bolster adjustment for the 8-way power driver seat lets you choose a setting that offers maximum support and comfort by twisting the seat controls on the side of the base of the seat.

4-way Lumbar Support

Air Cell Lumbar Support for the 8-way power driver seat lets you reposition areas of resistance in the seatback, up-and-down and side-to-side, for maximum comfort and support.

Cushion extension

To help relieve fatigue, an optional thigh extension for the driver moves the front edge of the seat base forward, supporting a larger area of the driver's thighs.

Integrated Memory System (IMS)

The Integrated Memory System saves two presets for driver's seating positions, outside rear view mirrors, Head Up Display and cluster display.

Head Up Display

With the customisable and height adjustable Head Up Display (HUD), key driving information is discretely projected onto the windshield in your line of sight so that you can safely focus on the road ahead. Vehicle speed, cruise control, audio and blind spot detection information are included and can be personalised.

Dynamic Stability Damping Control

While aiming to predict the driver's inputs, depending on road conditions and driving style, the Dynamic Stability Damping Control (DSDC) can be tuned to respond with more agility to improve high-speed stability points during vigorous driving.

15 speaker Harman/Kardon® premium sound

The Harman/Kardon® sound system includes subwoofers that resonate in hollow parts of the frame and body. Clari-Fi technology enhances digitally compressed music while Active Sound Design augments acceleration, shifting and suspension sounds for an enhanced driving experience.

INTUITIVE

Rear Cross-Traffic Collision Warning (RCCW)

Enjoy peace of mind whenever you back the Stinger out of a parking spot or driveway. Its RCCW system uses radars to detect the presence of cross traffic in the lane your vehicle is entering. If it senses vehicles approaching from either the right or the left, it will give you an audible warning until the path is clear for you.

Blind Spot Monitoring

Using radar to monitor the sides and rear of the vehicle, Blind Spot Monitoring employs visual alerts on the side view mirror to inform the driver about vehicles in the blind spot for easier and safer lane changes.

7 airbags

To help protect occupants and potentially reduce injuries in the event of a collision, the Stinger offers driver and front passenger airbags, two front-side airbags, two side-curtain airbags, and a driver's knee airbag as standard.

Autonomous Emergency Braking

Using radar and camera data, the Stinger senses the potential for a collision with a pedestrian, car or object ahead, and applies emergency braking to avoid or reduce the effects of a collision.

Around View Monitor with Parking Guidance

This intuitive system combines four wide angle images from cameras at the front, rear and sides of the vehicle to give you a bird's eye view of your surroundings while parking or moving at speeds below 20 km/h.

* Fuel consumption figures shown are from standard Australia Design Rules tests and are stated for the purpose of comparison. Actual results achieved will differ according to operating conditions and driving style.

** Not all handsets may be compatible.

Apple CarPlay: Requires an iPhone 5 or later and it is recommended to always update your iPhone to the latest iOS release. Use the Apple Lightning® cable provided with your phone or, Apple certified Lightning cable.

Android Auto: Requires an Android phone with Android 5.0 Lollipop or higher. It is recommended to always update your phone to the latest OS release. Use the USB cable provided with your phone.

Kia Motors cannot guarantee continued compatibility.

SERVICES

5 YEAR Warranty Programme (OR UP TO 100,000KMS)

All new Kia Passenger Vehicles come with an impressive 5-Year/100,000 km (whichever comes first) Warranty Programme covering against manufacturing or assembly defects. This warranty programme is transferable between owners and emphasises our commitment to our customers.

5 YEAR Roadside Assist

A Roadside Assistance Programme for the duration of the Warranty Period is also offered on every new Kia at no cost. In the unlikely event that your Kia has broken down, help is only a call away and trained staff will be despatched to your location. If a repair cannot be conducted on the spot, the vehicle will be towed free of charge to the nearest Kia dealer.

INCIDENT CARE

If you and your new Kia were unfortunately involved in an incident or crash that requires body repairs to your Kia, Kia Incident Care is here to help you, and is free for the first five years.

Visit Kia.com/NZ for full details and terms & conditions.

THE ENVIRONMENT

ECO-CONSCIOUS

So you value sustainable living? We do too.

That's why we take pride in rising to meet the expectations and challenges of the 21st century while making tangible contributions to the preservation of the environment and sustainable development of society.

Our environmental research centre spearheads our drive for the production of clean hybrid and fuel-cell vehicles to lead the way to eco-friendly cars for a greener tomorrow for you, your children and all of us.

From design through to recycling, we create innovative products, adhering to state-of-the-art Design for Recycling (DfR) guidelines. Even at the end of your car's life, we aim for eco-friendly return and treatment.

Operating a rigid process, we guarantee environmental protection in the treatment of harmful waste substances. These are then recycled or recovered, ensuring the highest level of environmental protection.

As you can see, what you do on a small scale with your household refuse, we at Kia Motors do on a large scale.
