Overseas Model Shown

All-new Kia Niro.
Refined by Design.

The perfect compact SUV, the all-new Kia Niro is a fluent expression of Kia's Opposites United design language. Shaped by advanced aerodynamics and offering class-leading space and safety, every detail has been considered to make life a little easier.

Not all features are available on all models.

The next step in style.

With increased Length, the Niro has been redesigned, including sculptural headlights and tail lights flowing into a signature rear C-pillar that highlights the profile.

As with every vehicle Kia designs, advanced engineering drives Niro's stunning looks. The arresting profile is shaped by advanced aerodynamics that improve energy efficiency, while the C-pillar conceals an extra air intake that reduces static pressure, allowing for exceptionally quiet and efficient highway cruising.

Inside, the Niro welcomes you with class leading amounts of interior space and legroom. There's more than enough space for everything from school runs, to outdoor adventures.

Not all features are available on all models.

Seamlessly blends petrol and electric power.

The Niro's Smart Hybrid powertrain offers the perfect balance of performance and economy. Pairing a powerful 32 kW electric motor with a responsive 1.6 litre petrol engine, the intelligent hybrid drive system switches between electric, petrol and a combination of both to deliver responsive power for urban driving. The 1.32kWh HV battery constantly recharges itself on the move or under regenerative braking, ensuring that an electric boost is always there when you need it.

Not all features are available on all models.

Your comfort zone.

Easy to read and operate, the dual 12.3" Digital Drive Cluster with 12.3" touchscreen infotainment display (GT-Line exclusive) hosts a multitude of features such as Bluetooth, Android Auto™ & Apple CarPlay™ connectivity to enrich your driving experience.

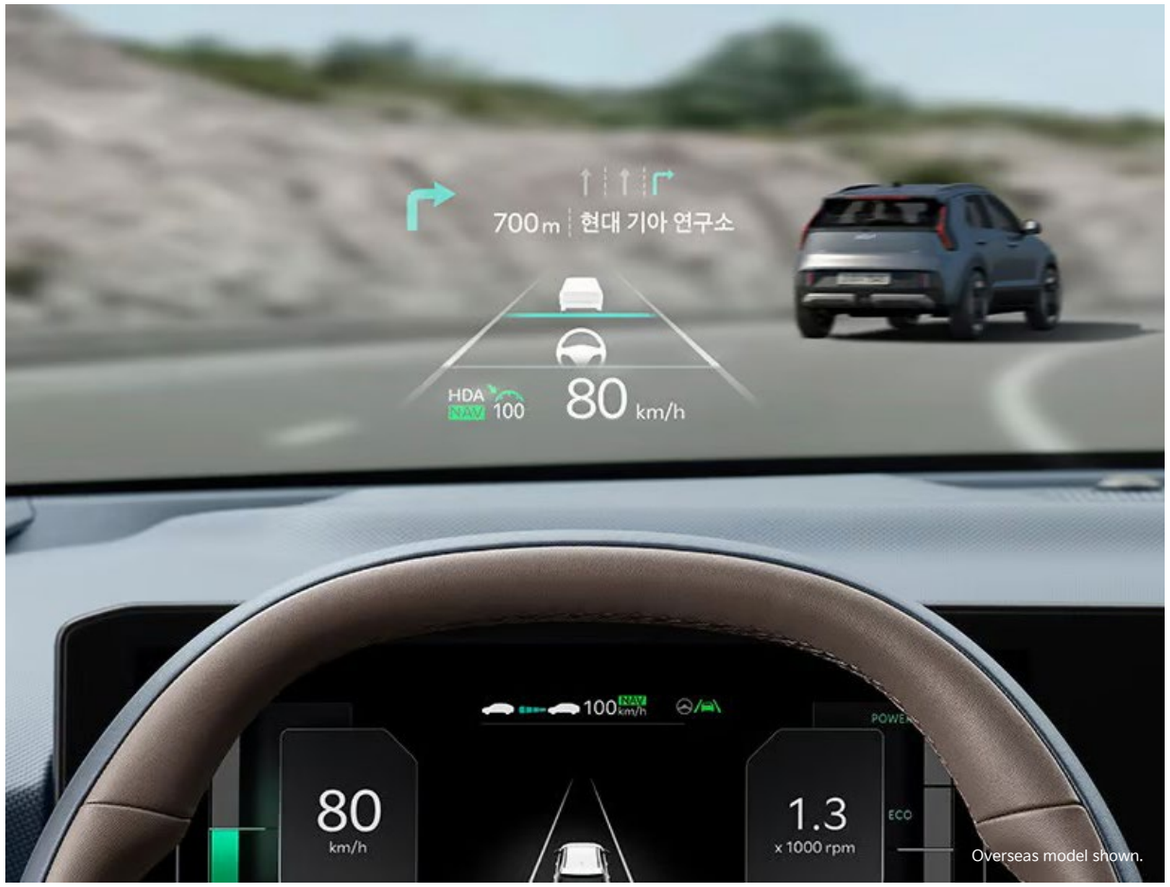

Available on GT-Line variants is the full colour Head Up Display (HUD). Navigation guidance, vehicle speed and speed limits are projected directly on the windshield, so you can look ahead while keeping your eyes on the road.

Standard across the lineup is the Switchable Control Panel. The infotainment and climate control systems share the same LCD touchscreen buttons. Press the fan / arrow button to switch between climate and infotainment controls.

Technology meets convenience.

In the GT Line model, Remote Smart Park Assist allows you to enter and exit parking spaces using the key fob as a suite of sensors precisely guides your Niro into even the tightest of spaces.

Overseas model shown.

When you have your hands full, stand behind your parked Niro for three seconds with the key close by and the hands-free smart tailgate in Niro GT Line models opens automatically.

Advanced safety technology in Niro GT-Line provides a "second pair of eyes" for added confidence. The Surround View Monitor shows a 360-degree bird's-eye view, making it easy to navigate tight parking spaces and avoid obstacles that may be out of sight. The Blind-spot View Monitor enhances highway driving by showing your left and right blind spots in the digital instrument cluster whenever a turn signal is activated.

The next level of safety.

With a rigid passenger cell and seven airbags, the new Niro protects you with a suite of active collision avoidance and safety assist systems including Kia's Advanced Driver Assistance System* (ADAS) that steps in to control the brakes if it senses the risk of a collision.

Overseas model shown.

Smart Cruise Control (SCC)
Smart Cruise Control is able to maintain a specific speed set by the driver. The distance to the vehicle ahead can be selected from 1 to 4 levels, and automatically drives while maintaining the vehicle distance and set speed. SCC automatically stops the vehicle when the preceding vehicle stops, and automatically starts when the preceding vehicle starts again within 3 seconds. After 3 seconds, the vehicle starts when the driver operates the accelerator pedal or as a switch.

Forward Collision Avoidance Assist (FCA)
Monitors the Road ahead using cameras and sensors to detect vehicles, pedestrians or obstacles. It provides warnings of an imminent collision and can automatically apply the brakes to help prevent or reduce the impact.

Blindspot Collision Avoidance Assist (BCA)
Detects vehicles in the driver's blindspot and provides visual and audible warnings when a potential collision is detected. If the risk increases, the system can apply braking to help avoid or mitigate a collision.

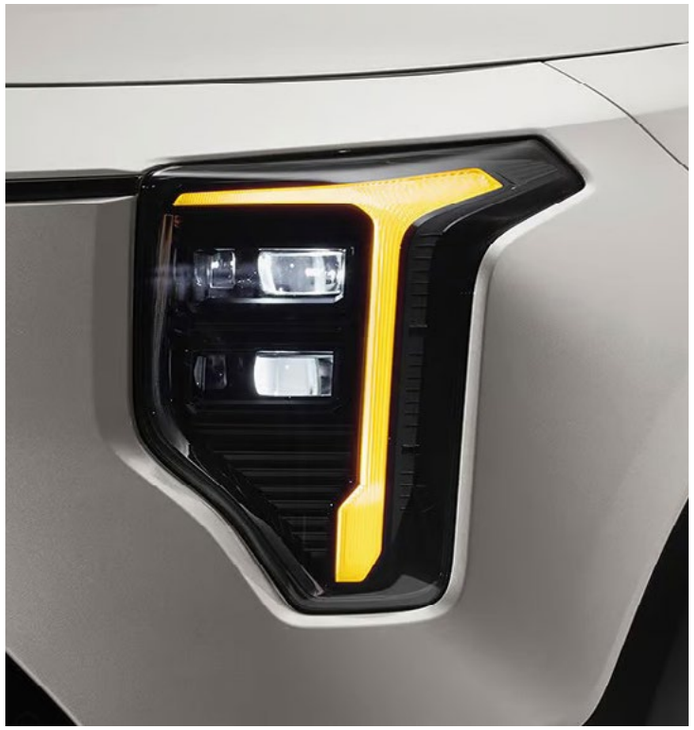

Lane Keep Assist (LKA)
Uses the front camera to detect lane markings and helps prevent unintended lane departure by providing steering input and/or warnings to keep the vehicle within its lane.

Lane Follow Assist (LFA)
Helps maintain the vehicles position centred within the lane by continuously monitoring the lane markings and providing active steering assistance, particularly during highway driving and when used alongside Smart Cruise Control.

*Safety technologies are supplemental systems and do not replace the need for the driver to exercise care and attention.
For more information about Kia's safety systems, please refer to your Kia vehicle's owner's manual.

Kia confidence goes further.

7 YEAR Factory Warranty
QUALITY REDEFINED

All new Kia HEV Passenger Vehicles come with an impressive 7-Year/150,000 km (whichever comes first) Warranty Programme covering against manufacturing or assembly defects. This warranty programme is transferable between owners and emphasises our commitment to our customers.

8 YEAR High Voltage Drive Battery Warranty
(OR UP TO 160,000 KMS)

All new Kia vehicles that are powered by a high-voltage drive battery come with a 8-year/160,000 km (whichever comes first) warranty that covers components found in the drive battery case. In the event that your vehicle becomes immobile due to a high voltage battery or system failure, we'll cover the cost of the tow to the nearest authorised Kia dealer.

5 YEAR Roadside Assist

A Roadside Assistance Programme for the duration of the Warranty Period is also offered on every new Kia at no cost. In the unlikely event that your Kia has broken down, help is only a call away and trained staff will be dispatched to your location. If a repair cannot be conducted on the spot, the vehicle will be towed free of charge to the nearest Kia dealer.
